

*Application No. 09/414,483
Office Action dated July 22, 2009
Response dated August 14, 2009*

REMARKS

The examiner alleges that there are two groups of inventions. More specifically, the examiner alleges that:

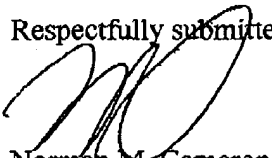

- 1) the subject matter of claims 53 to 58, 63 and 64 is directed to a building component, classified in class 52, subclass 282; and
- 2) the subject matter of claims 59 to 62 is directed to a method of making a building component, classified in class 52, subclass 741.1.

The examiner thus alleges that an election/restriction is required under 25 U.S.C. 121.

In response the applicant has elected to proceed with claims 53 to 58, 63 and 64 without traverse. Claims 59 to 62 have been cancelled without prejudice.

It is believed that the objection has been overcome and the application is now in order for allowance.

Respectfully submitted,

Norman M. Cameron
